**Text :**

The invention of the telephone is one of the most important inventions of all time. It changed the way people communicate.

Alexander Graham Bell was the inventor of the telephone. He was born on March 3, 1847, in Scotland. He was a scientist and a teacher who studied the science of sound. He had an idea to make a device that would be able to transmit sound from one place to another. He finally succeeded in 1876. The telephone was the first device that allowed people to talk to each other over long distances. Today, there are many different kinds of telephones, such as landline phones, cell phones, and VoIP phones. They are not used for phoning only, but you can listen to music, take photos, and play games. Graham Bell died on 1922. (Adapted)

**Read the text carefully and do the following activities**

**Part One: (14 pts)**

**A) Reading Comprehension: (7 pts)**

**Task 01: I Fill in the biographical ID (3 pts)**

**Name :**

**Job :**

**Date of birth :**

**Place of birth :**

**Date of death :**
